Contents Volume 59, 2002

Research Papers

Sources of non-glacial, loess-size quartz silt and the origins of "desert loess"
B.J. Smith, J.S. Wright and W.B. Whalley 1

Geometric morphometrics and geological shape-classification systems
N. MacLeod 27

Mud volcanoes—the most important pathway for degassing deeply buried sediments
L.I. Dimitrov 49

Sm–Nd isotopic systematics as tectonic tracers: an example from West Avalonia in the Canadian Appalachians
J.B. Murphy and R.D. Nance 77

Shortening budgets and the role of continental subduction during the India–Asia collision
M.R.W. Johnson 101

Review of global 2.1–1.8 Ga orogens: implications for a pre-Rodinia supercontinent
G. Zhao, P.A. Cawood, S.A. Wilde and M. Sun 125

Mechanisms for folding of high-grade rocks in extensional tectonic settings
L.B. Harris, H.A. Koyi and H. Fossen 163

Dinosaurs "re-write" the geodynamics of the eastern Mediterranean and the paleogeography of the Apulia Platform
A. Bosellini 211

The age and accretion of the earth
Y. Zhang 235

Antimony in the environment: a review focused on natural waters II. Relevant solution chemistry
M. Filella, N. Belzile and Y.-W. Chen 265

Earth Reflections

The complexity of simple geology
A.J. van Loon 287

Contents Volume 59, 2002 297
